CALIFORNIA RANGELAND *Trust*

This map depicts potential rangelands. The Grazing and Farmland of Local Importance categories in the Farmland Mapping and Monitoring Program (FMMP) dataset were combined to identify rangelands. Farmlands of Local Importance are defined differently for each county and may or may not be rangeland. To address this issue, Farmlands of Local Importance were only included if the Upland Habitat Goals vegetation type was consistent with rangelands vegetation types.

Land Status

- Private Rangeland
Land on which the existing vegetation is suited to the grazing of livestock.
- Public and Protected Land
Fee Title and Conservation Easement
- Urban and Built-up Land
- Other Land
